

MAYUR PANSARE

Software Development Engineer

mayurpansare2321@gmail.com | +91-9209935327 | [linkedin-mayur-pansare](https://www.linkedin.com/in/mayur-pansare) | github.com/pmayur02 | mayurpansare.dev

Pune, India

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python

Backend & API Development: Node.js, Express.js, REST API Design, FastAPI

Frontend Technologies: HTML, CSS, React.js

Database Management: MySQL, MongoDB, PostgreSQL, Prisma ORM, Mongoose

Authentication & Security: JSON Web Tokens (JWT), bcrypt, Token-based Authentication

AI/ML Technologies: Large Language Model (LLM) Integration, Vector Embeddings, Semantic Search, Hugging Face API

Development Tools: Git, GitHub, Postman, Swagger, VS Code, Azure, Supabase

Core Software Development Concepts: Object-Oriented Programming (OOP), Multi-tenant Architecture, Role-based Access Control (RBAC), Data Validation, Middleware, Agile Methodology, Version Control

WORK EXPERIENCE

Software Development Engineer 1

Oct 2023 – Jul 2025

Jio Platforms Limited

Navi Mumbai, India

- Designed and developed 10+ scalable RESTful APIs using Node.js and Express.js to support core product features in a production environment, demonstrating strong back-end development skills.
- Optimized database queries and backend logic, reducing API response time by 30% and improving overall system performance through efficient programming practices and systematic code optimization techniques.
- Identified and resolved multiple production and pre-production bugs using systematic debugging techniques and problem-solving skills, enhancing system stability and reducing runtime errors by 25%.
- Collaborated effectively with cross-functional frontend teams in an Agile development environment to ensure seamless API integration, system integrations, and timely feature delivery using version control best practices.
- Participated in code reviews and maintained comprehensive documentation to ensure code quality, knowledge sharing, and adherence to software development best practices across the team.

PROJECTS

DeskWerk – AI-Powered Helpdesk Ticketing System

github.com/pmayur02/DeskWerk

Node.js, Express.js, MongoDB, LLM, Hugging Face API

- Developed a comprehensive multi-tenant REST API architecture with role-based access control (RBAC) and secure JWT-based authentication, implementing robust back-end web development practices and object-oriented programming principles.
- Integrated Large Language Model (LLM) inference using Meta LLaMA via Hugging Face API to auto-generate intelligent ticket resolution suggestions, demonstrating proficiency in AI/ML integration and modern technology implementation.
- Implemented vector embedding-based semantic search using Sentence Transformers for Retrieval-Augmented Generation (RAG) to retrieve similar historical tickets and improve resolution efficiency.
- Built smart auto-assignment logic with department-based routing, agent/resolver fallback mechanism, and comprehensive data validation middleware for enhanced system reliability and user experience.

AI-Powered Resume Screening & Ranking System

github.com/pmayur02/ResumeScreeningAgent

Python, FastAPI, MySQL, LLM API

- Built an AI agent that scores resumes against job requirements across multiple dimensions and returns explainable, structured reasoning for each decision
- Designed a MySQL schema and REST API to store jobs, resumes, and AI-generated evaluations
- Added PDF resume ingestion (text extraction) and integrated OpenRouter to support swappable LLM backends

EDUCATION

Bachelor of Engineering in Computer Engineering

Aug 2019 – Mar 2023

RMD Sinhgad School of Engineering - Pune, India
